

A scatter plot showing the relationship between Life Expectancy (X-axis) and GDP per capita (Y-axis). The X-axis ranges from approximately 55 to 90, and the Y-axis ranges from approximately 10 to 100. A blue regression line shows a negative correlation. A specific data point is highlighted with a red circle and a red square, indicating a country with a life expectancy of approximately 78 and a GDP per capita of approximately 25. A blue arrow points from the red circle to the red square.
